PROFESSIONAL SUMMARY

Full-stack developer with strong expertise in JavaScript/TypeScript ecosystems and 5+ years of experience developing web and mobile applications. Entrepreneurial-minded engineer with a track record of launching successful products and leading technical teams. Specializing in Vue.js, Laravel, and cross-platform mobile development with Capacitor.

TECHNICAL SKILLS

- **Languages**: PHP, JavaScript, TypeScript, Python (basic)

- **Frontend**: Vue.js, Nuxt.js, React (familiar)

- **Backend**: Laravel, Node.js

- **Mobile**: Capacitor

- **UI Libraries**: PrimeVue, TailwindCSS, Bootstrap, Daisy UI, Bulma, Vuetify, Material UI

- **Databases**: MySQL, PostgreSQL, MongoDB

- **DevOps**: Docker, GitHub Actions, Pulumi, Cloudflare Functions

- **Other**: WXT, Hono, Logto Auth, AWS (Cloud Practitioner certified)

- **Methodologies**: Test-Driven Development, Modular Architecture

EXPERIENCE

Founding Engineer · *Osos EdTech Platform*   January 2023 - Present

- Co-founded and developed medical education platform now serving 2000+ students with 30K LYD revenue within 6 months of launch

- Led frontend architecture decisions and implementation using Vue 3, Nuxt 3, and PrimeVue UI library

- Engineered cross-platform mobile application using Capacitor, enabling native functionality while maintaining a single codebase

- Established monorepo architecture using npm workspaces for streamlined development across web and mobile platforms

- Built and managed application infrastructure and development workflow

- Currently leading strategic planning for third phase of development following successful beta and full release

Founder · *Stasher*   January 2024 - Present

- Developing an AI-powered knowledge management solution for browsing activities

- Built modular Laravel backend with focus on scalability and performance

- Created cross-browser extension using Vue 3 and WXT for seamless user experience

- Implemented contextual AI algorithms for intelligent content retrieval and suggestion

- Secured 60+ waitlist registrations through limited initial marketing efforts

Freelance Developer   February 2024 - April 2024

- Revitalized legacy Laravel 9 and Vue 2 project for NGO promoting peace in southern Libya (UNDP/DRI funded)

- Successfully navigated technical constraints of older codebase while implementing new features

- Effectively communicated complex technical concepts to non-technical project manager

- Delivered project on time and within scope, leading to client satisfaction and successful deployment

Think.iT GmbH · *Software Development Engineer*   June 2022 - December 2023

- Revamped internal HR project interface using Material UI; enhanced user experience for employee onboarding/off-boarding

- Developed custom Directus extensions using TypeScript; achieved perfect NPS score from stakeholders
- Integrated multiple third-party APIs including Google Workspace, Slack, and Small Improvements
- Established security best practices for company's WordPress website; led a team to resolve critical bugs
- Created user management module with TypeScript for AWS Cognito, approved by tech lead within one sprint
- Collaborated with senior engineer to implement multi-tenancy architecture, restructuring MongoDB data modeling
- Mentored junior developer to successful promotion within 6 months
- Coordinated department-wide pair programming sessions and led AWS certification study group, with 80% pass rate

Libyan Spider LTD · *Frontend Developer* July 2020 - April 2022
- Contributed to 2 high-demand projects managing 500k requests per day at peak
- Engineered Vue.js application supporting 96% of market browsers, with focus on performance and usability; reached over 2M requests/day at peak
- Assisted web design department across multiple WordPress projects by developing/modifying plugins and providing PHP and JavaScript expertise
- Undertook full-stack developer role for government back-office application; managed data flow control and delivered to stakeholder satisfaction within 2 months

Usoul Almaaref LLC · *Founder* June 2020 - July 2022
- Founded and launched "Ladeed," a bootstrapped food delivery application achieving 200 orders within first 3 months
- Navigated competitive challenges from venture-backed competitors through strategic pivoting
- Explored restaurant virtual menu solution as secondary product offering

ARTTECH Technology · *Software Engineer* April 2019 - May 2020
- Collaborated with a team of 7 members on the development of an in-house food delivery system using Laravel and Vue.js

AWARDS AND ACTIVITIES

Winner of Tech Stars - Go Green Hackathon · *Expertise France*	Nov 2021
Winner of Tech State Hackathon · *Expertise France*	Apr 2021
Participant in Stream Business Incubator · *Expertise France*	June 2020
Speaker at Tech and Entrepreneurship Awareness - TEA Time · *Hexa Connection*	Mar 2020

EDUCATION

College of Computer Technology	Tripoli, Libya
BSc Software Development	Sep 2016 - Dec 2021
AWS Cloud Practitioner Certification	March 2023
